

# ECO-ONE OXO-BIODEGRADABLE PLASTIC MULCH

100% BioDegradable

## Eco-One TOTALLY BIODEGRADABLE Plastic Mulch.

Both clear and black Eco-One oxo-biodegradable (OBD) plastic mulch have been used and sold successfully for several years. Eco-One is able to be sold in various widths to serve your needs. Eco-One OBD mulch films provide the strength required to ensure a tight fit over raised and flat beds, while improving growing conditions.

### Benefits of ECO-ONE OBD Plastic Mulch:

- Saves you time and money – completely degradable so there is no pick-up or disposal - no labor, no cleanup and no landfill.
- Eco-One OBD has all the benefits of regular mulch such as increased yields, easy installation, earlier harvest, soil warming, weed control and moisture retention.
- Environmentally sound degradation: Laboratory studies indicate that this degradable plastic breaks down into CO<sub>2</sub>, H<sub>2</sub>O and biomass without toxic residues.
- Degrades fully both above and below the soil.
- Eliminates pickup and disposal costs.

# ECO-ONE OXO-BIODEGRADABLE PLASTIC MULCH

100% BioDegradable

## Phase 1. Application and Transplanting.

Laying of Eco-One OBD film and transplanting can be done using the same equipment as used for conventional plastic mulch.

## Phase 2. Growing and Harvesting.

With Eco-One OBD expect all the benefits of conventional plastic mulch.

## Phase 3. No Pickup or Disposal

No cost or time is required to pickup Eco-One OBD plastic.

## Phase 4. Working the Field

After working the soil the field can be plowed down and the film residues will continue to degrade breaking down into CO<sub>2</sub>, H<sub>2</sub>O and biomass.

**Eco-One OBD mulch should be used with an understanding of the product, which is provided on the purchase order**
